2014 FORD F350 SUPER DUTY Vehicle Description

This 2014 Ford F350 Super Duty presents a robust option for those needing serious towing capacity and durability. With a clean title status and a mileage of 76,195, this used pickup truck combines reliability with practicality. The striking White Platinum Metallic Tri-Coat exterior complements its rugged build, while the 6.2L V8 engine delivers 316 horsepower and 397 lb-ft of torque, making it ideal for hauling heavy loads. Equipped with a tow package and 4WD drive, this truck is ready to take on challenging jobs and tough terrains, ensuring you get the work done efficiently. Its automatic transmission provides smooth shifting, making it suitable for both work and everyday driving. Designed for safety and performance, this F350 features 4-wheel ABS to enhance braking control and a programmable safety key for added security. The vehicle's heavy-duty construction and versatile features position it as a dependable choice for commercial use or serious hauling needs. Whether you're tackling construction sites or towing RVs, this Ford F350 delivers power and safety in one package. Its used condition offers an affordable opportunity to own a capable, high-performance pickup that's built to last. 2014 FORD F350 Safety and Security Features The 2014 Ford F350 is equipped with 4-wheel ABS, which helps maintain steering control during hard braking, reducing the risk of accidents. Additionally, it includes a programmable safety key that allows owners to restrict vehicle operation, adding an extra layer of security against unauthorized use. These features contribute to the overall safety and peace of mind for drivers and fleet operators alike. 2014 FORD F350 Performance Features This model features a part-time 4WD system, offering enhanced traction and stability on challenging terrains or adverse weather conditions. The combination of the 6.2L V8 engine and the 4WD drivetrain ensures the truck can handle tough jobs with confidence. Its performance capabilities make it a reliable choice for demanding workloads, providing both power and control when it matters most.
